PROACT PHARMACY BENEFIT MANAGEMENT

Core Formulary

July 2026 – Specialty Medication Listing

Maintenance drugs are medications prescribed to treat chronic, long-term conditions and are taken on a regular, recurring basis. Examples of maintenance drugs are those used to treat high blood pressure, heart disease, asthma, and diabetes. When medically appropriate, maintenance drugs can be filled for up to a 90-day supply.

PLEASE NOTE: Brand-name drugs may move to non-formulary status if a generic version becomes available during the year. Not all drugs listed may be covered by your prescription plan, please review your summary plan description for a list of exclusions. Grandfathering will not be provided for any excluded medications.

Generic Medications are listed in lower case letters.
Example: ibuprofen

Brand Medications are listed in upper case letters.
Example: AJOVY

For the most current listing of covered medications or if you have questions, please visit **www.proactrx.com** or call the ProAct Help Desk at **1-877-635-9545**.
